

are you ready for the next sustainability theme ?!

Thank you everybody for participating for the first theme!! We now have **over 20 photos** from **12 different people**, and have gotten people to think more about the things we usually take for granted. Starting on **July 5th** (tomorrow), the theme will be...

6 CLEAN WATER AND SANITATION

clean water and sanitation!

This theme affects everybody, even those of us living in the most developed countries. Six years ago in Flint, Michigan, lead pipes contaminated drinking water, exposing 30000 children to a devastating neurotoxin, permanently hindering their growth [1].

Again, we've included a few links below (in this post!) if you'd like to do some reading. We're excited to see your posts, and have fun exploring!

And—if you don't have the QR code for the mini program...

Scan this code to join our growing community!

not sure how to post?

1

Do some reading! Being informed requires you to learn more about the world around us.

2

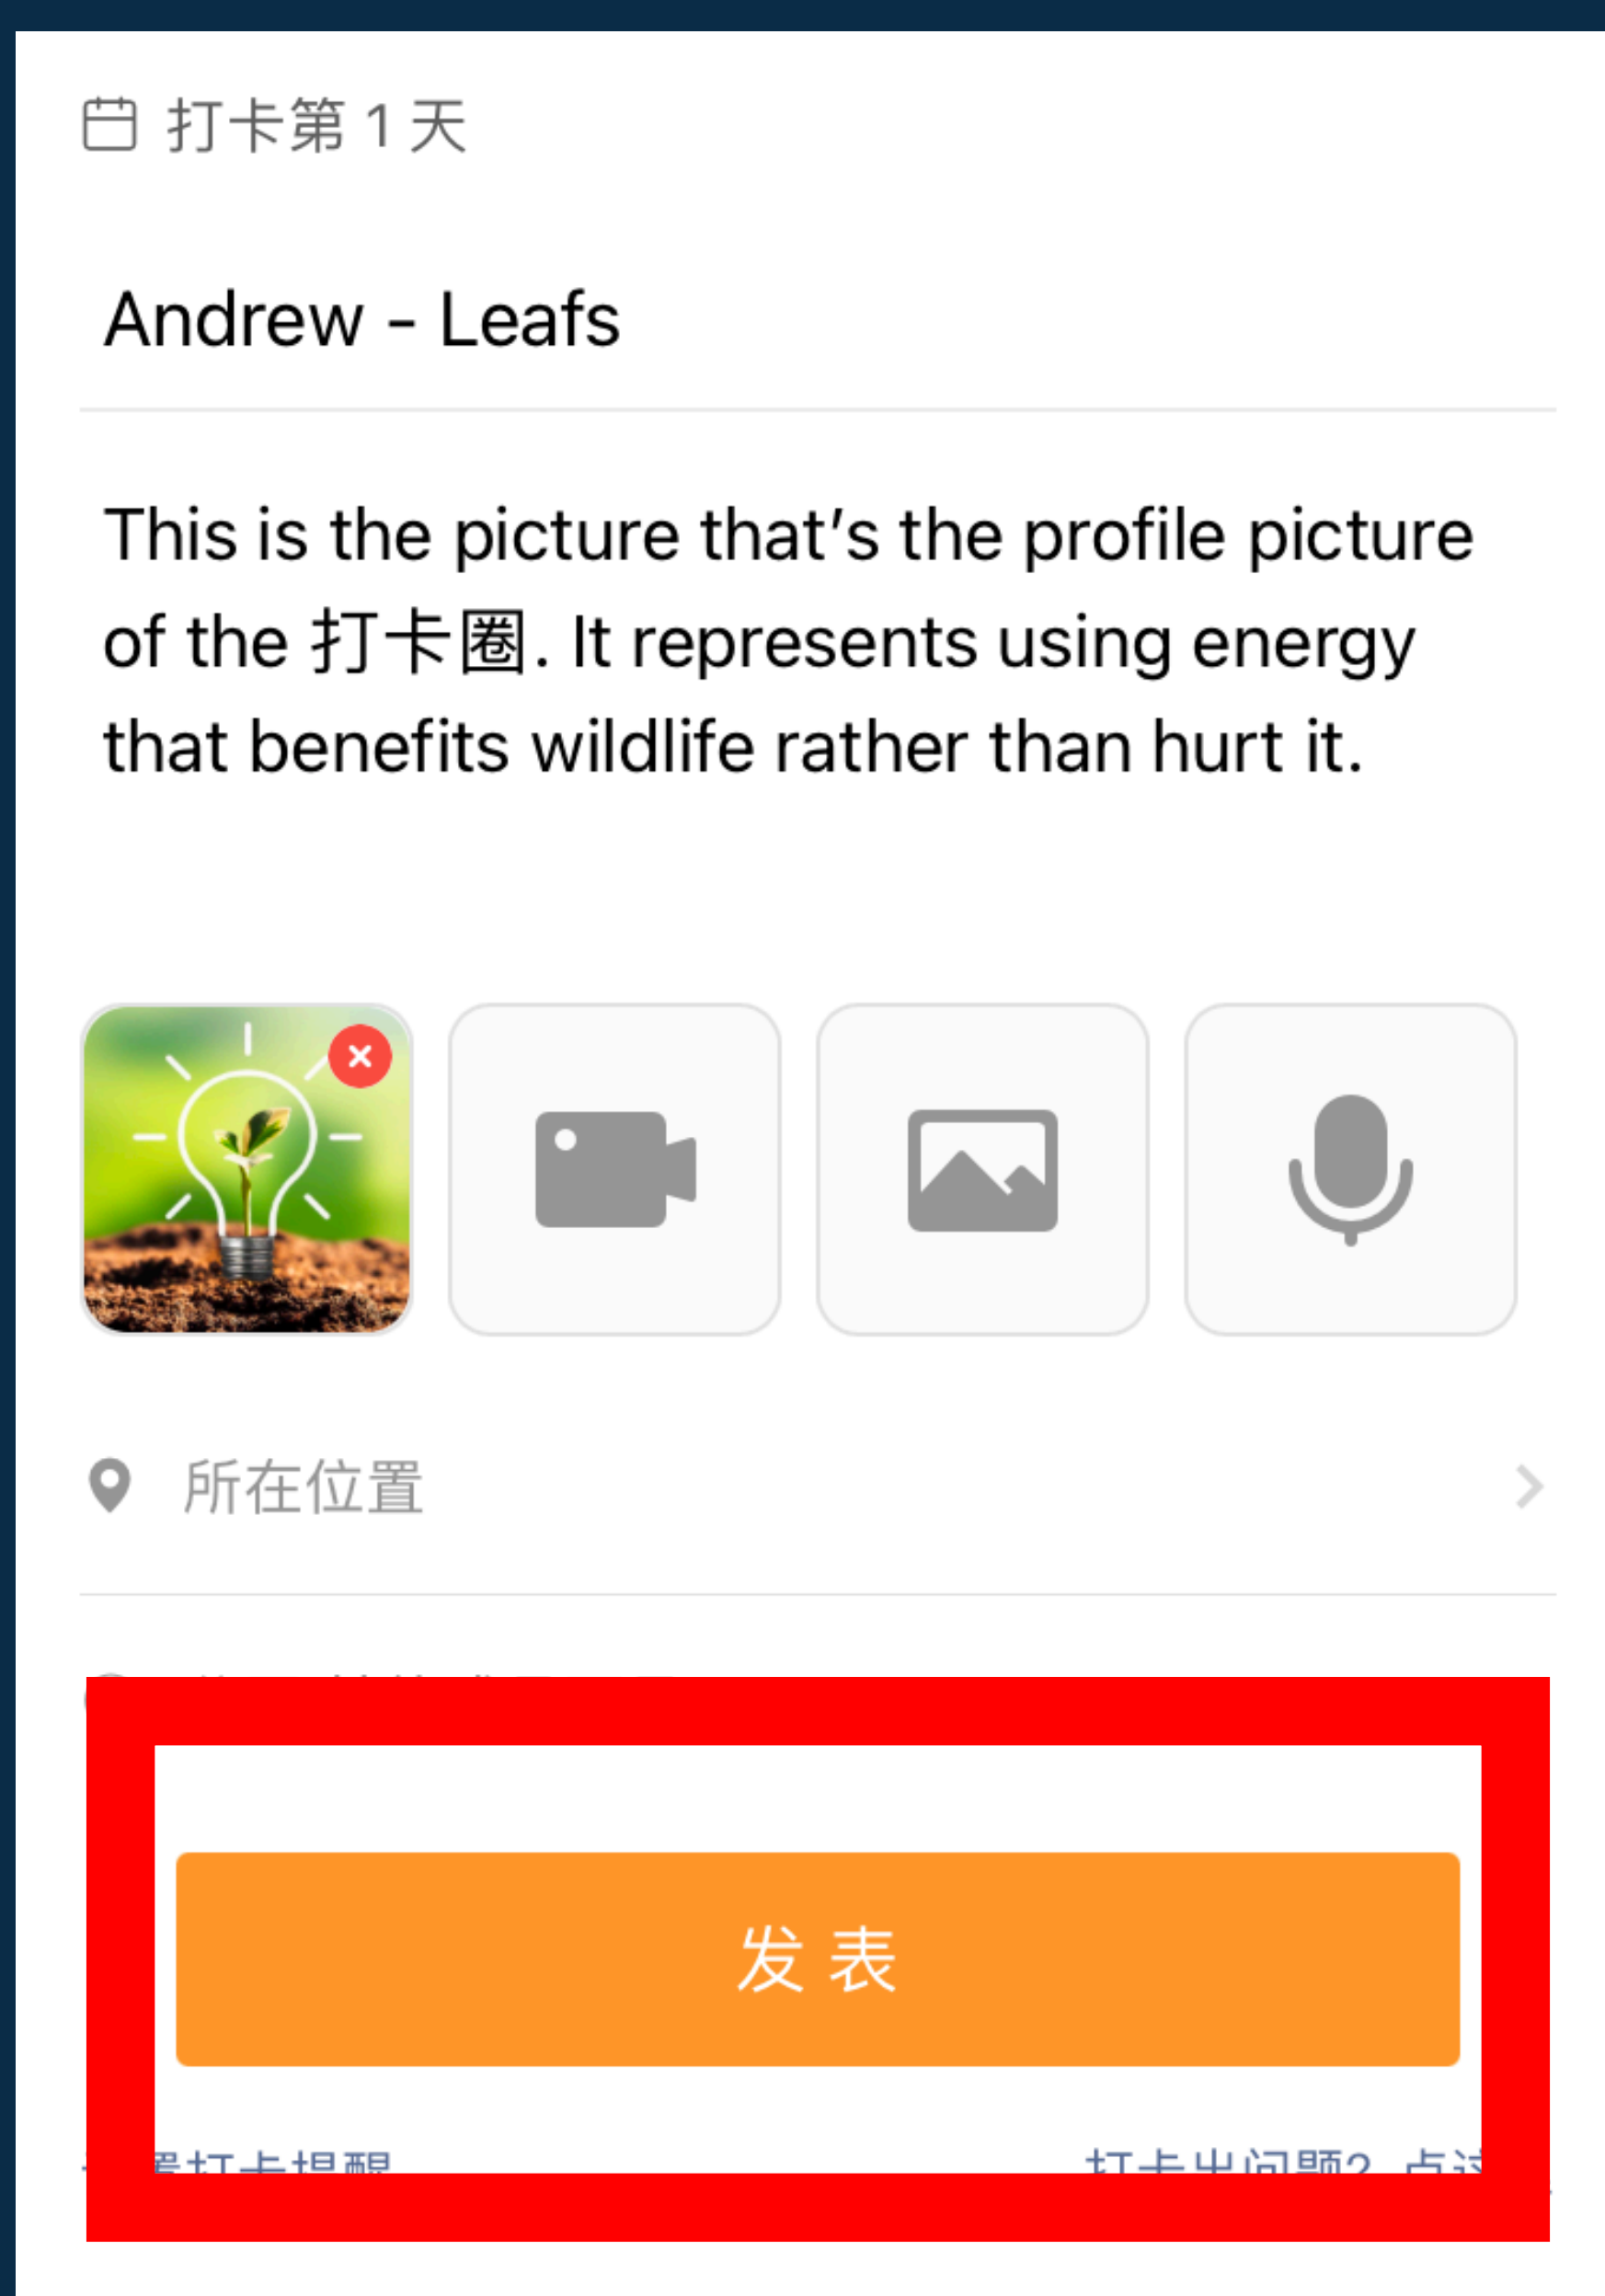

Take a picture of something that relates to the goal! The photo can be goal-related challenges or solutions around you.

3

Scan the QR code above to join the **小打卡** group

4

Write a ≈30 word statement telling us whether your photo is a problem or solution, how your photo relates to the goal, and where you took the picture.

5

Post your photo! We're excited to see your pictures. Go like the posts you like!
